

Scheuneman Protocol for Lyme Disease
Eric Scheuneman - 2nd Edition 2018-02-14 www.eric-lyme.ca

This Protocol is based upon direct experience (detailed in another document - Scheuneman Experience) plus the following documents:

- (1) German guidelines: <https://canlyme.com/for-physicians/> Bottom of page
- (2) Dr. Burrascano guidelines: <https://canlyme.com/for-physicians/> Bottom of page
- (3) Article summarizing Stevia Leaf extract paper:
<https://www.healthspiritbody.com/lyme-disease-treatment/>
- (4) Research paper testing Stevia Leaf extracts:
<http://akademai.com/doi/pdf/10.1556/1886.2015.00031>

Canada, the United States and the European Union have approved Stevia leaf extracts as a food additive - but one should always be watching for side-effects. Lyme Disease bacteria can assume 3-4 different forms and cause many different symptoms which can confuse understanding what is happening.

Stevia additives were generally taken without food and doses taken about 6 hours apart such as 8 am, 2 pm, 8 pm. Probiotics were stopped while taking all additives and prescriptions to ensure that probiotics would not 'use up' the antibiotic action.

No Symptoms & Preventative

This is recommended for a confirmed tick bite and no symptoms. Lyme Disease test will likely be negative at this point.

Prescription

- Doxycycline 400 mg per day for 21 days.

Non-Prescription

- **NOW® BetterStevia® Original** 60 mL bottle (about \$13 in health food stores): Shake well and take 12 drops in ½ cup (4 oz or 118 mL) of hot tap water 3 times per day for 5 days, then 18 drops for 5 days, then 24 drops for 5 days. ***This can be used on its own*** or with the prescription antibiotic.

Symptoms

Lyme Disease test will likely be positive after a few days of symptoms but still could be negative.

Prescription

- Doxycycline 400 mg per day PLUS Cefoperazone and Daptomycin for 21 days.

Non-Prescription

- **NOW® BetterStevia® Original** 60 mL bottle: Same procedure as above.
- Followed by **NutraMedix® Stevia** 30 mL bottle (about \$US 20 in America and about \$US 40 in Canada online from NutraMedix®): Shake well and take 18 drops in ½ cup of hot tap water 3 times per day for 4 days, then 24 drops for 10 days.

Note: After Doxycycline at 400 mg per day for about 10 days had no effect on Stage 3 Lyme Disease symptoms - NOW® BetterStevia® Original - **Stevia B** in Figure 1 of document (4) above - treatment left just a trace of symptoms. Then NutraMedix® Stevia - **Stevia A** in Figure 1 of document (4) above - treatment eliminated the last trace of symptoms. ***These two Stevia treatments mirrored the laboratory results of document (4) above where Stevia A was the best performer and worked better overall than even the combined 3 prescription antibiotics.***

Note: If the two Stevia treatments above have little or no effect on symptoms, then this strongly suggests the cause is a co-infection or something else requiring further diagnosis and treatment.
